Mrs. T. B. Smith's Residence on 3rd St. Destroyed by Fire

The home of Mrs. T. B. Smith fell prey to fire on Saturday about 12:30 p.m. Prompt action by the Volunteer Fire Brigade and several willing helpers managed despite the flames and dense smoke to remove the furniture and personal belongings and save the house from being completely gutted.

Fire which started in the basement spread rapidly between the walls and to the roof. Clouds of smoke hampered the firemen but they fought desperately to quench the flames and soon had the fire under control.

Mrs. Smith, on seeing the flames, rushed next door to the home of Mrs. M. Dewar who turned in the alarm.

Friends and neighbors helped to move the furniture away for storage. Loss in the fire is not covered by insurance.

Mrs. Smith is a widow and has been a taxpayer in Coleman since 1912.

Card of Thanks

I gratefully appreciate all that was done by the Coleman Fire Brigade in working so hard and long to save my property, and I also wish to thank my neighbors and friends who so faithfully and willingly assisted the firemen. Thank you one and all.

Mrs. Florence Smith

Lethbridge wins over Blairmore

On Friday, January 25, the Blairmore Juveniles suffered their second defeat when they met the Lethbridge Hornets. Although the weather was nippy, a good turn out was on hand.

The first period was fast and well played. The Lethbridge squad took an early lead in the game and held it right to the end. The Hornets sizled three snappy markers past the Blairmore goalie while Cornez scored the only one for Blairmore. The score ending this period stood at 3-1 for Lethbridge.

In the second, the Hornets kept their lead by scoring two more while Blairmore also scored two which were credited to Bartlette and Fraser. The final score remained at 5-3 in favor of Lethbridge.

In the third outcome, Blairmore looked as if they might tie up the score as they came within one point behind Lethbridge. But the Hornets kept up the fight and tallied twice more. With just a minute left Blairmore pulled their goalie which proved unbeneficial because Lethbridge tallied with a long shot. Blairmore's third period goals were scored by Churla and Chernecky. The final score was 8-5 for Lethbridge.

Credit is surely due to both teams because of such fine hockey and so few minor penalties.

Card of Thanks

I would like to take this opportunity of thanking Dr. Aiello, the nurses and hospital staff for their many kindnesses extended to me during my stay in the C. N. Pass Municipal Hospital.

I would also like to thank those who sent me flowers and get well cards.

Sincerely
[Mrs.] Cecilia Burrell.

Canada's 1956 total of 1,382 tuberculosis deaths registered a new low.

Coleman Nips Cranbrook

The Coleman Grands won their fifth game in six starts by dropping the powerful Cranbrook Selkirk 6-5 in a well played hockey game attended by a good crowd last Sunday afternoon.

The fast Cranbrook crew took the lead early in the first period when Lode scored at 7:25.

Kryczka tied the score at 10:50 on a neat pass from Joe Biegun. Biegun again figured in the scoring as he scored on a rebound at 11:30 to give Coleman a 2-1 lead at the end of the first period.

In the second both teams pressed but were unable to score until the 17:45 mark when McDonald of Cranbrook tied the score at 2-2 which remained until close of the second period.

Coleman put on a spirited drive in the third as Jenkins, Scodellaro and Gettman scored to give Coleman a three-goal lead at the seven minute mark.

Cranbrook came back at 7:50, when Walmsey narrowed the margin to two goals.

Cranbrook continued to press and had Coleman hanging on. Joe Joseph in the Coleman nets held Cranbrook back on a number of dangerous occasions.

Boetti of Coleman, put Coleman up three goals at 14:20. This appeared to give Coleman a comfortable lead but it soon dwindled as Folk and MacDonald scored within a minute to narrow the margin to one goal.

Cranbrook continued to press and had Coleman on the run but failed to get the equalizer.

The cleanly played game featured only seven penalties—four to Coleman and three to Cranbrook.

Coleman has two home games coming up — one on February 6th against the Fernie Rangers, and on Sunday, February 10th at 2:30 p.m. against the powerful Great Falls Americans.

Hockey fans are reminded not to miss these two games which should produce some good hockey. **Coleman 5—Cranbrook 5**

SUMMARY:

1st period: 1 Cranbrook, Lode (Laurie, Jones) 7:25; 2, Coleman Kryczka (Biegun) 10:50; 3, Coleman, Biegun (Fraser) 11:30.

2nd period: 4, Cranbrook, McDonald (Johansen) 17:45.

3rd period: 5, Coleman, Jenkins, Cerney; 3:45; 6, Coleman, Scodellaro (Kryczka, Biegun) at 5:30; 7, Coleman, Gettman (Collins, Jenkins) 5:50; 8, Cranbrook Walmsey (Sullivan) 7:50; 9, Coleman Boetti (Scodellaro and Kryczka) 14:20; 10, Cranbrook, Folk (Nelligan) 14:50; 11, Cranbrook, McDonald (Walmsey) at 15:55.

Penalties — Coleman 4, Cranbrook 3.

Grands Express Thanks

The Coleman Grands Hockey Club wishes to express its thanks and appreciation to the hockey fans for their fine support.

The Crows Nest Pass Curling committee also deserves a hearty thank you for cancelling the afternoon draw of their Crows Nest Pass curling "spiel". Your co-operation is fully appreciated.

Talented Artist To Be Heard In Recital

Helen Schmidt of Regina, who will complete the final date in the Young Artist Series of Concerts, will appear in the Blairmore United church auditorium on Thursday, Feb. 14. Winning the audition for the Young Artist 1957 spring tour was an 18th birthday gift for Miss Schmidt. Helen has been a consistent winner in both violin and piano competitions besides being one of Regina's busy music teachers, accompanists and recitalists. Included in her many awards won were the Grace Knowlton Scholarship, the Orpheus Scholarship and finally the Toronto Conservatory of Music Scholarship for both piano and violin. Last year she appeared as the guest pianist with the Regina Symphony Orchestra and for this performance she was highly commended.

Lorna Dancosine

To Citizens and Organizations in Coleman

Make Coleman THE Crows Nest Pass town to be represented at the Banff Winter Carnival. Back our Queen candidate, Lorna Dancosine, who is sponsored by the Coleman High School, by buying the blue tickets when the High School students come to your door.

All contributions in the form of both co-operation and financial aid will be willingly and gratefully received.

We sincerely thank all who are backing our Queen candidate and certainly hope she will get over the top.

Joint Installation Pass Masonic Lodge Impressive Ceremony

A very impressive ceremony took place in the Blairmore Masonic Hall when a joint installation of the 1957 officers for all the lodges of Blairmore, Coleman and Bellevue took place.

Chief installing officer for the evening was Charles Young ably assisted by Director of Ceremonies E. C. Costick.

Officers for Summit Lodge No. 30 of Coleman installed were: Worshipful Master, W. Bro. G. Jenkins, I.P.M. W.W. Brother H. R. Pattinson, Senior Warden — Bro. E. Allen, Junior Warden — Bro. H. Wellens, Treasurer — R. W. Bro. A. E. Graham, Secretary — W. Bro. H. Allen, Senior Deacon — Bro. M. Dunford, Junior Deacon — Bro. A. McQuarrie, Senior Steward — Bro. T. Cochrane, Junior Steward — Bro. C. J. Picard, Organist — W. Bro. S. Murdoch, Chaplain — Bro. R. Upton, Tyler — W. Bro. J. A. McDonald.

Rocky Mountain Lodge No. 86, Blairmore officers installed were: Worshipful Master — W. Bro. H. Lord, I.P.M. — W. Bro. R. B. Burgman, Senior Warden — Bro. J. A. McKay, Junior Warden — Bro. A. M. McKay, Treasurer — W. Bro. D. MacPherson, Secretary — Bro. A. R. Plante, Senior Deacon — Bro. E. G. Montabetti, Junior Deacon, Bro. L. M. Chrystal, Senior Steward — Bro. C. A. Freeman, Organist — Bro. W. H. Mark, Chaplain — Bro. A. J. Williams, Tyler — W. Bro. A. G. Blake.

Sentinel Lodge No. 26, Hillcrest officers installed were: Worshipful Master — W. Bro. S. Costanza, I.P.M. — W. Bro. C. Woodward, Senior Warden — Bro. W. F. Harvey, Junior Warden — Bro. J. P. Fisher, Treasurer — W. Bro. J. Shevels, Secretary — W. Bro. P. Padgett, Senior Deacon — Bro. A. J. Burton, Junior Deacon — Bro. Wyndham Jones, Senior Steward — Bro. G. K. McLeod, Junior Steward — Bro. S. Radford, Chaplain — Bro. E. Gouling, Tyler — W. Bro. J. Radford.

Consolation winner was Mrs. J. Bartoletti.

U.I.C. processing thousands of claims

Despite the return to work of CPR employees, local offices of the Unemployment Insurance Commission are still processing thousands of insurance claims for persons laid off as a result of the labor dispute, William McKinstry, regional director for the commission in Vancouver stated recently.

"Although no official determination has yet been made as to what groups are free from disqualification under the labor dispute section of the UI act, it is expected that most groups will be able to establish an entitlement free from disqualification," he said.

The regional director explained however, that the "allowable earning feature" which became part of the Act in October, 1956, in many instances may result in no payment for the temporary layoff.

"In the case of the maximum rate of \$23 per week for a claimant without a dependent, or \$30 per week for a claimant with a dependent, the allowable earning is \$13. Any excess of this in the week in question would be deducted from the weekly rate," he added.—Cranbrook Courier.

The Queen Elizabeth Islands, lying north of the great east-west passage and belonging to Canada are the most northerly lands in North America.

Total mineral production in the Yukon Territory and Northwest Territories in 1955 was almost 38 million dollars.

Jacpot Eludes Bingo Players

Despite the bitter cold weather a good crowd attended the regular Elks bingo on Friday evening. However, no one was successful in taking the \$80 jacpot. This means the jacpot will be \$90 at the next bingo on Friday, February 8th.

Mrs. J. Harly was the winner of the \$10 jacpot consolation.

Lucky winners of the lovely prizes for the evening were:

1—Grocery hamper, T. Holstead

2—Service set, W. Lonsbury.

3—Lamp, R. Brown, Blairmore.

4—Sheets and pillow cases, E. Ledue.

5—Dishes, Mrs. H. Ash.

6—\$25 cash, split by Mrs. J. Ewing and Mr. J. Kryvott.

7—Groceries, Mrs. J. Jones

8—Overnight bag, Mrs. V. Phillips.

9—25 gallons gas, C. Westley.

10—Aluminum fry pan, Ralphina DeLuca.

11—Cannister set, S. Squarek, Bellevue.

Consolation winner was Mrs. J. Bartoletti.

Blairmore Trounces Taber

On Wed., Jan. 23, Blairmore having travelled to Taber, exhibited a fine calibre of hockey to the Taber fans. The Blairmore squad, with speed skating and pin-point passing outplayed the Taber squad by a trim 11-5 victory.

Eagen and Arseneault tallied twice for Taber in the early minutes of the first period. Blairmore's line change proved to be Taber's fate as Churla and Chernecky scored for Blairmore. Towards the few remaining minutes of the period Churla again cleverly outwitted the Taber goalie. The score ended at 3-2 in favor of Blairmore.

The second period proved to be Blairmore's as they scored five markers (by Chernecky, singleton-Churla and Cornez tallied twice) Basset scored the only goal for Taber. Thus the score 8-3 for Blairmore.

Taber, in the early minutes of the third, scored on a neat stick handling job by Kong. Rulge scored another for Taber. Blairmore, nervous and anxious to finish the game managed to bag three more goals which were landed by Churla, Chernecky and Deoux. The final score ended at 11-5 for Blairmore with Churla scoring 5 of the 11 goals and the Coleman forwards scored all but one of the 11 goals.

Hillcrest Home Prey To Flames

Fire that started in the basement completely destroyed a three story home owned by Harry Jones of Hillcrest around midnight Thursday. It is believed the fire started from an oil furnace in the full basement of the frame insubricked home.

Mr. Jones, employee of the Coleman Collieries, on the afternoon shift was returning home when he noticed the fire in the basement. He turned in an alarm and both the Hillcrest and Bellevue firemen attended the fire but were unable to save the building nor its contents. Just before 3 a.m. the hoses froze hampering the work of the firemen. All of the contents of the home including a refrigerator, many electrical appliances and other furniture as well as Mr. Jones' clothing were lost in the fire. Insurance was carried and the damage is estimated to be several thousands of dollars.

Another home just south of the Jones home was slightly damaged from the heat of the fire.

Former Mine Supt. Dies In Calgary

Leslie Moore McDonald, 53, of Calgary, passed away suddenly after a heart attack at his home.

Born in Chicoutimi Mines, Nova Scotia, he came to Bankhead, Alberta, in 1909. In 1922 he came to Bellevue where he was employed at the Bellevue mine for a number of years. When the Coleman Collieries Company was formed he came to Coleman. He was made mine superintendent in 1947 and held this position until he went to Calgary in 1951. He was employed in Calgary by the C.I.L. Corporation until his death.

Deceased was a member of the Crescent Lodge No. 87, A.F. & A.M., the Elks club, Army, Navy and Air Force Club, No. 2 branch, Calgary, and the International Chemical Workers' Union.

Surviving are his wife, Mary; two step-sons, Bobby and Allen Dryden, of Calgary; two brothers, Clyde of Bellevue, and Avarad, and one sister Jane, all of Calgary, Alberta.

Funeral services were held from Fosters Funeral Chapel on Wednesday, with Rev. Ernest Phillips officiating. The remains were cremated.

First World War Vet Passes

Stephen Bettinger, 83, passed away in the Crows Nest Pass Municipal Hospital on Monday following a brief illness.

Mr. Bettinger was born in Munster, Belsen Limburg, Belgium, and came to Canada in 1912.

He first settled in Blairmore, where he worked in the mines and later went to Frank where he lived for a short time before joining the Canadian army in 1914.

He served with the 56th Overseas Battalion. He was discharged in July, 1918, and returned to Frank where he owned a shoe repair shop. He also served as town police in Drumheller during the late 1920's, and returned to the Pass in 1932, living in Blairmore for some time before moving to Coleman. In 1932 he retired on an army pension. He was a member of the Canadian Legion.

He was predeceased by his wife Marie at Blairmore in 1943, and by a daughter in Belgium in 1912 and by a son in Belgium in 1933.

Surviving are his son Ernest, of Coleman; a daughter, Mrs. E. Elizabeth Houze, two grandchildren, Armond and Louise, and two great-grandchildren, George and John, all of Hillcrest.

Private funeral services were held from the chapel at Hall's Funeral Service Ltd. at 2 p.m. on Saturday afternoon. Interment was in Blairmore cemetery.

Religious Survey To Be Taken

The beginning of a religious survey which will cover the entire Pass area, will take place in Coleman in the immediate future.

The Coleman section of the survey is sponsored by all the major Christian denominations in Coleman. It will be carried out by the students of the Coleman high school.

Only two questions will be asked each household—whether or not that person or family has any connection, either as a member or an adherent, with any church or religious group in the Pass—2, if there is no connection whatsoever, whether or not such persons desire to be contacted by any church or religious group in the Pass.

It would be appreciated if house holders would tell the students taking the survey, whether or not there are any other persons, who are not the children of the householder, (such as boarders, grandparents, etc.) staying with them, or any married children living with them.

The results will be grouped by denomination and each denomination grouping will be available to the denomination concerned. Those who are not connected with any church and have no desire to be connected with any church, will answer no to both questions.

The purpose of the survey is to locate any person accidentally overlooked by the church concerned, and to give any who may desire it a chance to be contacted by the church of their choice.

The rest of the Pass will be covered by this survey in the near future.

C. Y. O To Hold Dance

On Friday, Feb. 1st, the Coleman C. Y. O. will again hold a teenage dance in the Catholic Hall. This was decided at their regular meeting on the Sunday before last when all the members gathered and discussed the tremendous success of the Rock 'n' Roll dance and several future undertakings. They hope that the dance this Friday will be just as successful as the previous ones. Everyone is welcome.

During 1955 the average Canadian family income went up eight per cent to \$4,460.

Saskatchewan has a total area of 251,700 square miles.

The Northwest Passage was first sailed both ways in a single season by the R.C.M.P. schooner "St. Roch" in 1944.

'Hopper threat serious in '57

More than four million acres of farm lands in southern Manitoba are expected to be infested with grasshoppers next summer.

This information was given to members of the provincial Grasshopper Control Committee called into session to make plans for control measures next year. They were told that farmers in some 30 of Manitoba's 126 municipalities and government controlled districts will be faced with the necessity of taking steps to control grasshoppers.

Chairman of the Committee, H. E. Wood, said the annual grasshopper egg survey conducted by the federal Entomological Branch at Brandon reports indications are that a much more extensive area will be infested in 1957 than this year. The outbreak is expected to be some seven times more serious than in 1956. He added that weather may intensify or lessen the present threat.

Mr. Wood said that since the turn of the century all three prairie provinces have been subject to recurrent cycles of grasshopper infestations. These cycles seem to take about 11 years, and within one cycle, damage is done to crops in four or five of them.

The Committee decided to continue the present policy of allowing farmers a rebate of 50 percent on all purchases of chemicals over ten dollars. The rebate is paid jointly by the province and municipality. In addition, it was decided to prepare a map-poster to be distributed in all areas threatened with grasshoppers.

Sitting with Mr. Wood on the Control Committee are Dr. R. D. Bird and W. Romanow of the Brandon Entomological Lab, Dr. A. J. Thorsteinson of the University of Manitoba, and H. A. Craig, director of publications for the Manitoba department of Agriculture.

STOCKTON WOMAN WINS FRAZER 4-H TROPHY

Mrs. R. O. Brown, who founded the Stockton 4-H club seven years ago and has led it, repeated victories since, has been awarded the W. S. Frazer trophy as the outstanding 4-H club leader in the province for 1956.

Tennessee is an Indian name meaning "river" of the great bend.

Keep busy and live longer says "Diamond T" owner

The best way to describe Dr. Hugh L. Dixon, owner of the Diamond T Ranch, is that he is 70 years young and doesn't act a day over 30.

One of the good doctor's pet sayings, and believe me, he practices what he preaches, is, "always leave a couple of hours a night for sleeping. Sixteen hours a day of work is enough for any man." Dixon, with a twinkle in his eye, added, "never made any money in bed in my life."

Dr. Dixon was born in Maple Creek, Saskatchewan, in 1886. He graduated from the Ontario Veterinary College in 1910. In 1928 he was stricken with a bad heart attack and was flat on his back for an entire year. After leaving the

"FOUR MILES NORTH, THEN WE TAKE THE OLD ROAD..."—Buddle of intent men is comprised of United Nations Emergency Force personnel, trying to map their path, uncertain in more ways than one. The map study session took place near Baliza, on the Sinai Peninsula. The international police force has been gradually replacing British and French forces in the Suez area, and has been moved into a buffer zone between Israeli and Egyptian troops on the peninsula itself.

I will say a prayer

Now, when I grow up I am going to do
All of those things that they say are taboo;
I'll not go to bed 'cause the clock strikes eight-thirty—
I'll not wash my face just because it is dirty.

I'll kick off my covers and have not a care,
But just for a caution: I will say a prayer;
I'll say "Yes please," "No thank you" whenever I find
That the reason for this is a "must" of some kind;

I'll go when I like and I'll come as I choose—
And those who don't like it, for them I've got news.
I'll care not a whit that my clothes are a mess,
I'll wear jeans and sweaters—they'll do for a dress—
I'm tired of "doots" and I'm tired of "do's".
I'm tired of grown-ups all crying the blues.

Yet when I am grown up and orders I give,
I'll be down on adults that taught me to live;
I'll tell all the world off, and have not a care—
But just for a caution: I will say a prayer!

Leading British physicist curbs atom optimism

By ROBERT C. COWEN

There is no hope for an atomic-powered automobile and very little hope for nuclear-powered aircraft, according to Sir George Thomson of Cambridge University, a leading British physicist. Nonetheless, he says that atomic energy is a rare example of a scientific discovery that has come "in the nick of time" to rescue a country about to be throttled by a growing fuel shortage.

Sir George's outlook on atomic-powered cars and aircraft may seem overly pessimistic to research engineers in the United States aircraft and automotive industries who are actively working on these developments.

But the British physicist said that the problems of shielding passengers and crew, in his thinking, precluded any extensive use of atomic energy for these purposes.

However, Sir George's pessimism on one trend of atomic development did not prevent his speculating imaginatively on others during a major address at the annual meeting of the British Association for the Advancement of Science.

These included the possibility of taking electricity directly from the atom without the need for the boilers and generators used today and, before many years, the harnessing for peaceful purposes of fusion processes like those of the hydrogen bomb.

As far as Britain is concerned, Sir George said, atomic energy has been an industrial lifesaver.

For several reasons, including a growing reluctance among miners to work in the mines when good jobs can be found on the surface, Britain does not seem able to produce more than about 200,000,000 tons of coal a year. Yet it needs a good deal more and has gone from being a coal-exporting nation to being a coal importer.

"Nick-of-time" discovery
The dollars that can be spent as though the country would be strangled by its inability to expand its use of power, the thing above all others which matters in modern industrial economy," Sir George explained. But atomic energy solved this problem and Britain's first nuclear power plants soon are to be dedicated.

Then, turning to the question of what lies ahead in atomic developments, he sketched the broad outlines of what he foresaw.
For one thing, he pointed out that no one has found a way to take electric power directly from the atom. This is a very difficult but not impossible thing to do.

In present designs, atomic energy is turned into heat which is used to power steam generators in a conventional way. But this method is very inefficient. If some way can be found to take electric power from the atom directly, it could be a great saving.
On a small scale, this is already being done in the so-called "atomic batteries". These are very low-power devices that turn the radiations given off by certain radioactive materials directly into electricity. They are useful in special

electronic devices. But, for technical reasons, they could never be developed as large power supplies.

Fusion possibility
Indeed, Sir George said that he, himself, sees little chance of direct generation of electricity from the atom as long as the current fusion reaction with uranium fuel is used.

But the fusion process using deuterium (heavy hydrogen) is more promising in this respect. When fusion is tamed, Sir George explained, the production of electricity directly from the atom may be mastered as well.

The biggest problem with fusion, of course, is the fact that it requires temperatures like those in the middle of the sun. No one yet has found a practical way to generate and control them. In spite of this, Sir George said that he "has" no doubt that in the not very distant future (fusion) will be tamed and used for peaceful purposes.

But, of the more immediate expansion of practical uses of atomic energy—specifically atomic-powered cars and airplanes—Sir George was more skeptical.

Radiation problem
Pointing out that nuclear power has its limitations, he explained that one of the biggest of these is the need to shield against its radiations and the present cumbersome nature of this shielding.

"There seems no way out of this," he said. "I do not see the slightest hope for the nuclear motor." I have grave doubts about the nuclear airplane.

This is not the first time that a prominent British natural scientist has scoffed at seemingly visionary projects that are under serious research and development in the United States.

Last year the Astronomer Royal was reported as saying that he didn't think anyone would put up the money for space flight development. Yet the United States earth satellite program was announced shortly afterwards.

Asked about this, some of the BAAS members explained that, as experts, they are perfectly aware of most foreign work in their fields. But they are conservative and, when they see valid difficulties that have not yet been overcome, they are not going to let their skepticism aside just because someone else is working on the problem.

"Of course Sir George knows you're working on nuclear cars and planes over there," one member explained with a smile, "but you Americans try to oversell every-

Two FREE patterns—printed in our ALICE BROOKS Needlecraft book—stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

GEMS OF THOUGHT

POPULARITY

That empty and ugly thing called popularity. —R. L. Stevenson.
Popularity—what is it? A mere mendicant that boasts and begs, and God denies charity.

—Mary Baker Eddy.

True popularity is not the popularity which is followed after, but the popularity which follows after.

—Lord Mansfield.

The most exhausting thing in life, I have discovered, is being insincere. That is why so much of social life is exhausting; one is wearing a mask.

—Anne Morrow Lindbergh.

The truly illustrious are they who do not count the praise of the world, but perform the actions which deserve it.

—George Henry Tilton.

Popularity is a crime from the moment it is sought; it is only a virtue when men have it, whether they will or not.

—George Savile.

Food faddists

Some of these food faddists recommend a daily eating of Swiss cheese and limburger. It has always been a puzzle why the Swiss cheese has the holes in it, whereas it's the limburger that needs the ventilation.

The bride was told by a well-meaning friend that sea food would give her husband that daily umph. So she went in and ordered oysters.

"Large or small, ma'am?" she said. "Really, I don't know, sir," she said. "They're for a man with a size 16½ collar."

She was probably the bride who worshipped her husband. According to Don Ameche, she used to place burnt offerings before him three times a day.

FALSE TEETH

That Loosen

Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plate dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just replace a little FALSETITE, the alkaline (non-acid) powder, on your plates. Hold false teeth more firmly, so you feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get FALSETITE at any drug counter.

"EXPORT"
CANADA'S FINEST
CIGARETTE

They have a small herd of registered Herefords and recently purchased an English bull. Dixon's ultimate goal is to breed big rugged critters with lots of bone.
Right now he is experimenting with his commercial herd by using Angus bulls on Hereford yearling heifers in order to get smaller calves.
The Diamond T menagerie also includes a fine herd of quarter horses which they have vaccinated for encephalomyelitis every year.
When asked if there was any suggestion or thought that seemed to stand out more than the others from his many years of experience on the range, Dr. Hugh emphatically stated, "yes by all means, don't overgraze, keep enough out so you can see one year ahead. A bad year may hit and you'll lose everything."—The Cutter Standard

Bake this delicious COFFEE LAYER CAKE!

<p>Sift together 3 times 1¾ c. once-sifted pastry flour or 1½ c. once-sifted all-purpose flour 2 tps. Magic Baking Powder ½ tsp. baking soda 2 tps. Instant Cheese & Senbon Coffee ½ tsp. salt</p>	<p>Cream ¾ c. shortening 1 c. lightly-packed brown sugar Add, part at a time, 2 well-beaten eggs beating well after each addition.</p>	<p>Combine ¾ c. milk ½ tsp. vanilla Add dry ingredients to creamed mixture alternately with milk, combining after each addition. Turn into 2 greased 8-inch round cake pans, lined in bottom with greased waxed paper. Bake in moderately hot oven, 375°, 25 to 30 minutes. Put layers of cake cake together with thick raspberry jam between and cover with a coffee-flavored frosting.</p>	<p>You can depend on MAGIC to protect all your fine ingredients... give you lighter, finer-textured results. Buy MAGIC Baking Powder next time you shop.</p>

Face off tricks

Here are some tricks you can use next time you are called on to take a face off. If you're a center or a defenseman, we suggest you practise them regularly until you have mastered the knack.

1. As the puck is dropped, quickly slap your stick against your opponent's to knock it away from the puck, and then sweep the puck back with the same motion.

Funny and Otherwise

A certain storekeeper reported a fire in his establishment the very day he signed a new fire insurance policy. The company suspected fraud, but had no proof. The only thing the manager could do was to write the policy-holder the following note:

Sir: You took out an insurance policy from us at 10:00 a.m. and your fire did not break out until 3:30 p.m. Will you kindly explain the delay?"

O'Leary's wife awoke in the middle of the night to hear her husband creeping about in the kitchen.

"What might you be looking for, darling?" she called out.

"Nothing," called back O'Leary. "Just nothing."

"Oh!" said his wife cheerfully. "Then you'll find it in the bottle where the whisky used to be."

A worried lady entered a department store and bought two packages of invisible hairpins.

Woman: "Are you absolutely certain these are invisible?"

Clerk: "Lady, I'll tell you how invisible they are. I've sold \$4.00 worth this morning, and we've been out of them for three weeks."

Teacher: "Now, Willie, if James gave you a dog and David gave you a dog, how many would you have?"

Willie: "Four."

Teacher: "Now, Willie, think hard. Would you have four dogs if James gave you one and David gave you one?"

Willie: "Yep. You see, I already got two dogs."

TREATED KINDLY

The York retreat was the first institution in England in which the insane were treated kindly. It was opened by William Tuke, an English philanthropist.

Greater choice of malting varieties would improve barley yields

At the present time there is a generally recognized need for new malting barleys. This is particularly true on the East Coast where yields of the currently grown varieties—Montcalm and OAC 21—have been declining steadily. In a number of areas, yields have been so disappointing over the past three years that some farmers have gone temporarily out of barley production. There is no doubt that weather conditions of late have not been favorable to the barley crop. Many plant pathologists and agronomists believe, however, that the major difficulty arises from the fact that too much of the barley acreage is devoted to one variety. In Manitoba, almost 60 percent of the barley acreage is sown to Montcalm.

Mr. W. H. Johnston, agronomist at the Brandon Experimental Farm, Manitoba, says past experience has shown that a concentration of any one variety may lead to difficulties. There is a build-up of the disease organisms, both in the soil and on stubble, capable of damaging that variety to a point where production becomes extremely hazy. A greater choice of suitable malting varieties would tend to relieve the present disease situation.

It is for these reasons that the new malting variety, Parkland, is being welcomed by both farmers and agronomists. The new variety is widely adapted from the standpoint of yield. It has consistently outyielded Montcalm and OAC 21 and compares favorably in many instances with recommended feed types. Parkland has a satisfactory bushel weight and a stronger straw than older malting types. It is resistant to the prevalent races of stem rust but, unfortunately, is susceptible to the smuts and to many of the leaf attacking diseases.

Lack of adequate disease resistance is a limitation of all currently grown malting types. A wider choice of variety—particularly those with increased disease resistance—would tend to stabilize barley yields over a period of years. Canadian scientists are aware of this fact, and the problems involved are being vigorously investigated at several barley breeding centers across Canada.

Don't neglect the water supply

Chickens need plenty of water, each bird consuming about two pounds of water for every pound of feed. Adequate provision must be made to give them a constant supply of water to assure maximum returns, says T. M. MacIntyre, Senior Poultryman, Experimental Farm, Nappan, N.S.

Experimental work at Nappan has shown that when the watering space available to 70 broilers was increased from 28 to 84 inches, there was an improvement in carcass grades although other factors such as feed consumption, body weight and feed efficiency were not affected.

While the provision of adequate watering space is important this does not seem to be as critical as keeping a constant supply of water available at all times. It has been shown that where waterers were allowed to go dry from 4:00 p.m. until the following morning, feed efficiency and weight gain decreased.

An adequate supply of clean fresh water is a must for laying hens. Lack of water results in decreased feed consumption and low egg production. The removal of water from a heavily laying flock for one day can result in a serious drop in egg production.

Choice of waterer is up to the individual. Automatic fountains are preferable for large flocks where a number of fountains may be placed in one pen, but for small flocks which may only be attended once or twice a day, manually filled waterers, large enough to carry a day's supply, have some advantages as there is no danger of a failure during the absence of the operator. Regardless of how water is supplied it is essential that water be available at all times if maximum growth and production are to be attained.

Travelling "snow"-house

The Governor General wasn't wearing parka and mukluks when he called on pretty Eskimos Pauline Aneroudluk and Annie Wetaluk in this igloo built by the Department of Northern Affairs.

No melting snow dripped down to aizzle on the frying pan in this colorful northern house-keeping scene for the igloo was at the Ottawa Men's Press Club Ball, 1,000 miles south of the Arctic Circle.

The Northern Affairs igloo has become the fastest-travelling snow-house in Canada, your average Eskimo and built in Ottawa of passive sky-oomie it was displayed first at the Canadian National Exhibition in Toronto this year where it proved one of the hits of the big "Ex".

Currently on display as centre-piece of an exhibit on arctic living at the Art Gallery and Museum in London, Ont., it will later travel to Hamilton where it will remain through January, 1957. On its return to Ottawa the igloo will be re-built in the rotunda of the National Museums of Canada, and leave for England and the International Boy Scout Jamboree next June.

Northern Affairs' experiment of constructing plastic igloos for display could introduce a new trend in arctic housing. At Cape Dorset on Hudson Strait in the Eastern Arctic the Department has built a test "snow"-house to find out how this dry, windproof, waterproof, plastic type igloo will stand up when exposed to the searing cold of arctic winter.

TIDY BARN

There is always a series of barn accidents at this season of the year and word of caution might be in order. Just plain good house-keeping will prevent a variety of accidents around the barn.

Ticklers

By George

"Have you ever had a crazy, mixed-up, don't-know-where-to-begin feeling?"

Quick Canadian Quiz

- Which of the four Atlantic provinces has the greatest population? Which of the three prairie provinces?
- The total number of Canadians under 15 years of age is 2 million, 4 million, 5 million?
- About two-thirds of all Canadians are now urban dwellers. What has been the principal factor in shifting population from rural to urban localities?
- Fifty years ago Norwegian explorer Roald Amundsen completed what famous Canadian sea voyage?
- Personal income taxes account for what proportion of the federal government's total tax revenues?

ANSWERS TO QUICK QUIZ

- Less than one-quarter.
 - The growth of the manufacturing industry.
 - Of the Atlantic provinces, Nova Scotia; of the prairie provinces, Alberta.
 - First voyage through the North West Passage.
 - 5 million.
- (Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

Fishing for the hardest metal

Thirty Danish geologists have started an unusual "treasure hunt" between Scoresby Sound and Danmarkshavn, Eastern Greenland. They are searching under the ice for one of the world's costliest and hardest metals—molybdenum. Soon they hope to locate exploitable deposits.

This silvery white metal is of great value in the processing of steel used for jet motors. During the last war it was used in the making of armour-piercing shells. Not until the first world war was its value as an alloy for producing super-hard metals fully realized, although research had revealed that molybdenum strengthened steel.

A German metallurgist in that year heard that a Japanese sword-maker had, back in the year 1300, made wonderful blades "that could cut a man in two at one stroke."

Obtaining one of these ancient swords, he analysed it, and found that it was molybdenum that made the sword so superior to others.

The term "hiding power"—used in connection with paint—refers to the capacity of a paint to conceal the surface that lies beneath it.

RIVETS

By George Sixta

Chinook Health Unit Serves Wide Area in Southwestern Alberta

Health Unit Board
Mr. J. Gunderson, chairman, Claresholm; Mr. Tom Story, vice-chairman, Fort Macleod; Mr. F. Lynch-Staunton, Lundbreck; Mr. Thos. Blundell, Fort Macleod; Mr. P. A. Blomquist, Medicine Hat; Mr. F. Abousaffy, Coleman; Mr. W. J. Gray, Blairmore; Mrs. Inga Day, secretary-treasurer, Fort Macleod.

Health Unit Staff
Public health nurse, Miss Olive P. Goodwin, R.N. senior nurse; stenographer - technician, Miss Sophie Pawluk.

Quarterly Report, Ending December 31, 1956

The first meeting of Chinook Health Unit Board was held on October 24, 1956. Present were Dr. Orford-Smith, director of health services and Mrs. D. McPhail, director of nursing services. Mr. Gunderson of Claresholm was appointed chairman of the Board, and Mr. T. Story of Fort Macleod vice-chairman. Mr. A. L. Millar acted as secretary-treasurer.

The head-office is in Fort Macleod. Mrs. Inga Day was appointed secretary-treasurer of the health unit; Miss Olive P. Goodwin of Red Deer as senior nurse; and Mr. Finley of Peace River as sanitary inspector.

At the request of the Department of Public Health, Edmonton, Miss Cogland, senior nurse of the newly organized Health Unit of Wetoka, accompanied Miss Goodwin on her reporting for duty on November 15, 1956, to aid in the organization. Miss Cogland was here nine and a half days.

On November 16, 1956 another board meeting was held. Dr. Orford-Smith and Mrs. D. McPhail were present. Dr. Adler of Newfoundland was appointed as medical officer, duties to commence February 15 or March 1, 1957. As Mr. Finley had written that he would be unable to accept the appointment as sanitary inspector, Mr. Hehr of Medicine Hat appeared before the board and was appointed health inspector, duties to start January 1, 1957. Miss Sophie Pawluk was appointed stenographer-technician, duties to commence Dec. 15, 1956.

It was decided to rent the lower floor, plus two rooms upstairs in the municipa building in Fort Macleod, after completion of the building for a clinic.

Arrangements have been made for the purchase of furniture and equipment, some of which has been received and is now housed in the temporary office.

A conference on health unit administration was held in Edmonton on Nov. 28-29-30, 1956, which was attended by Mr. Gunderson, chairman, Mrs. Day, secretary-treasurer and Miss Goodwin. This conference proved to be very helpful to all.

Because of the lack of transportation it has not been possible, as yet, to visit other areas of the district, but will be commencing around the first of the year when a car will be available.

Miss Pawluk started work on December 15, 1956.

A letter was received from Mr. Hehr stating that he is unable to accept the position of sanitary inspector here.

On Dec. 17, 1956 a board meeting was held and three applications for the position of staff nurse were discussed. Mrs. Jakobec of Blairmore appeared before the board. Two were approved. Miss Jarman to commence duty on Feb. 1, 1957 and Mrs. Jakobec to commence duty on March 1, 1957.

In the office the staff worked on what school records were available and opportunities were taken to become familiar with the health unit area.

Structure and Function of Health Unit

Health Units have been operating in Alberta for a sufficient time for their value to be well proven and the various services they provide have become well recognized.

The public in the towns, villages and rural districts need preventive health services, and can benefit from them in the same way as the residents of the cities do.

In Alberta the municipal or local governing authority has the duty of protecting its inhabitants, as far as it is able, against disease. In the areas covered by organized health units, a general public health program is carried out as outlined here.

The Board

The area of the unit is divided into seven wards. The authority having the largest population in the ward nominates one of its councillors to be the ward's representative on the board. The

board consists of these representatives and they manage the Unit.

Staff
The staff for which the department will contribute 80% of the cost may consist of a medical officer, public health or graduate nurses, sanitary inspectors, stenographer-technician and a secretary-treasurer. The board of a health unit has authority to employ a complete staff as outlined above, or any part of the staff outlined.

The Health Unit system makes it possible for the rural districts and smaller urban centres to have an efficient staff, providing an adequate program by combining such rural districts and urban centres into units having populations large enough to employ economically the services of a staff trained in public health work.

The Operation

The Health Unit operates from an administrative centre usually located in the middle of the area covered by the unit from which general administration of the health unit is carried out, and the board is authorized to establish offices for part of their staff at other centres throughout the district, if they so decide.

The board is in charge of the unit, their doctor, advising them and supervising the work of the unit. The health unit is entirely a local organization, having the same responsibility as a city health department. The Department of Public Health gives every help and advice in setting up the health units and the department's staff is available to advise the board and its staff. The board may provide services in addition to those included in the basic schedule, provided these are paid for out of local funds available.

The Economics

The service can be operated so economically because the combining of towns, villages and rural districts into a health unit makes it possible to set up a service based on areas with an adequate population, and because of the co-operation of the local authorities with the Department of Public Health of the provincial government. The unit is in the hands of the people themselves who may shape it to give the services they require.

The Department of Public Health arranges to the Board 60% of the actual expenditure under the approved budget and the contributing local authorities pay the balance.

The Services

The services which are provided include the following:

1. The control of communicable diseases by:
(a) An inoculation program - against small pox, diphtheria, whooping cough, as a routine, and various other diseases such as typhoid when this is necessary.

(b) The detection and control of sources of infection.

(c) The Health Unit doctor being available for consultation with the family doctor in cases of communicable diseases.

(d) The provision of routine laboratory service.

2. The Health Unit acts as the serum centre for the community.

3. Tuberculosis control by:

(a) Tuberculin testing.
(b) Arrangement for a community x-ray program.

(c) The supervision of cases, contacts and suspect cases.

4. Sanitation - Inspections are made and advice given on water supplies, sewage disposal, garbage disposal, milk supplies, meat and other foods, restaurants and other eating places. Laboratory facilities are provided for the testing of milk and water.

5. Post-Natal Service: Visits are made to the homes to advise the mother in the care of the infant and clinics are held in suitable centres to which the mother can take her infant for advice and immunization.

School Health Service

School children are examined on admission and later as requested by parents and teachers and as considered necessary by the doctor. The necessary measures are taken for the control of communicable diseases amongst school children and an immunization program is carried out. Advice is given on the sanitation of schools. Health education is carried out by means of talks and films suitable for the children so they may value and take care of their own health.

Mental Health Service

The Health unit co-operates with the Mental Health Division of the Department of Public Health in the provision of mental health services. Of particular value are

the "Guidance Clinics" held to advise parents on behaviour problems of children.

8. Health Education: Specific programs of health education are carried out by the Health Units. The Health Education Division of the Department of Public Health assists health units in these programs and supplies them with films and literature to enable them to take the best possible care of their own health and that of their children.

While the Health Unit does not give medical treatment, except in an emergency, they give much useful advice to people on their health in its widest sense.

Gas Distribution Explained to Fernie And Other Centres

Discussion of distribution of natural gas in Fernie when the West Coast Transmission line from Savanna Creek through the Crows Nest Pass to Kingsgate is complete were held at a special meeting heard tentative proposals from two representatives of Canadian Western Natural Gas Co. Limited.

F. W. Patterson, the company's manager for Lethbridge and district and Harvey S. Greenway, secretary of the company from Calgary, gave a review of the background and progress of their company in the distribution of gas in central and southern Alberta.

Mrs. Greenway stated that distribution of gas in the Fernie area would be a natural step for this organization because of the proximity of both production and market areas to the company's Alberta operations and hoped it would be invited to make a survey of all pertinent data such as engineering requirements, technicalities of a possible franchise, the extent of land required and to determine the rates at which it would be possible to supply local consumers.

Mr. Greenway was of the opinion that it would require two to three years to straighten out all the problems to be met when building a pipeline across provincial borders. Much red tape is expected to be encountered in obtaining the sanction of the federal board of Transport Commissioners, U.S. Power Commission and the Public Utilities Boards of the provinces involved before even the construction of a processing plant begins. The laying of the pipeline itself and the installation of gas service in the city would be accomplished in one season. It was pointed out, but the preliminary arrangements could be expected to extend too far into this year to make it possible to provide service here within the year.

Canadian Western is at present negotiating with producers to obtain supplies for distribution in the Crows Nest and East Kootenay districts, said Mr. Greenway. The company is primarily a distributing and servicing organization although it is also in the production field in a small way. It is the pioneer gas distribution agency in Western Canada, having begun its operations in Calgary 45 years ago.

The company now supplies gas in Calgary, Lethbridge and intermediate points and has just completed installation of gas service in Red Deer and other communities north of Calgary.

Mr. Patterson, in explaining how gas is transmitted, stated that 500 to 600 pounds of pressure are used at the supply source and the pressure is kept up by booster stations along the route. Regulating stations are necessary to reduce this pressure to about 10 to 15 pounds along lines leading to residences in towns and, when reaching individual meters, is further reduced to about four ounces.

Where the company has installed lines, it owns all pipe up to the property line, from where it is taken over by the consumer. Piping on private property costs \$5 plus 75 cents per foot, said Mr. Patterson.

After gas has been installed, the pipes, which have been treated against corrosion, are tested at high pressure to ensure their safety. All men engaged in installation must have passed proficiency tests.

In answer to a question regarding perpetuity or otherwise of franchises, Mr. Greenway stated that all franchises are for a period of 20 years with 10 year renewable clause. The municipality gives the company rights to use alleys or streets and the company in turn guarantees the city against damage to persons and property.

In dealing with the taxation question, Mr. Greenway said his company paid taxes in accordance with the mill rate in some communities. In others the company paid 5 per cent of gross receipts

in lieu of taxes. Many communities preferred the latter set up.

The generally accepted tax terms on the plants are escalating, running from one per cent in the first year, two per cent in the second, and so up to a maximum of five per cent of gross receipts.

Regarding rates to consumers, Mr. Greenway pointed out that the price varied according to the capital outlay required, servicing costs and other factors. The lowest rate charged by the company was 26 cents per thousand cubic feet (the Calgary rate) while the highest was 65 cents, which applied in only one isolated instance. He could, however, give no indication as to what rate could be expected in Fernie, but said it would be competitive with other fuels.

Mr. Greenway stated that if his company was able to obtain the franchise in the communities between the producing field and the outlet at Kingsgate a uniform rate could be established.

You Can Gamble But ... You Can't Win

You never gamble? Then you are in the minority.

A Gallup poll several years ago revealed that 57 per cent of adults gamble at one time or another. Annual take from slot machines is a billion dollars — and that means the amount the operators pocket from the back of the machines. It is estimated that 20 or 25 billion dollars a year go into organized gambling.

Raffles and bingo games boost the annual cost close to 30 millions.

These startling figures on American gambling are reported by Robert L. Hellbroner in February's Reader's Digest in an article entitled "Which Kind of a Gambler Are You?", but Hellbroner hastens to add that Americans should not necessarily be considered a gambling-mad people.

"Most Latin American nations help finance their governments with lotteries," he points out. "Turkey uses them to support welfare projects, Sweden to finance cultural activities, France to help balance the budget. Norway, Holland, Russia, Belgium, Greece, Italy, Japan, all have national lotteries. Gambling is a big business in Britain with 70,000 employees."

But Americans gamble often enough to profit from Hellbroner's

warnings on the odds against them.

"At the races, where you make legal bets through parimutuel machines, the track and state take 10 to 22 per cent of your money before your horse leaves the starting gate. The slot machines are regularly set to yield as little as 20 cents on the dollar. The numbers game, where the mathematical odds of winning are usually one in 999, pays out at only 40 to 60 percent of that ratio to a winner."

The Digest article lists five symptoms of the sick gambler as noted by a famous psychoanalyst:

1. He habitually takes chances, as contrasted with the time-to-time chance-taking of the normal man.
2. Gambling is the focal point of his life.
3. He never learns from experience.
4. He never stops when he has won.
5. He finds the thrill of gambling in the pleasure-painful tension of waiting.

Moral of Hellbroner's article: Run a mild gambling fever if you must, but don't get sick.

YOUR ALBERTA

TALKING OF FISHING, don't forget the importance of that sport in the tourist industry. And the importance of all other aspects of your government's activities, is encouraging people to visit here and return again year after year. That's an important reason why the government assists in training restaurant help to aid in making a good impression on resident and visitor alike. It's done through the Institute of Technology and Art in Calgary.

THERE ARE ALL SORTS of services offered by your provincial government that are not common knowledge among the people for whom they are intended. For example, the government is in the annuity business, with a branch of the provincial treasurer's department handling their sale. A rate of 3 1/2 percent is provided for, for a maximum annuity of \$1,500 at age 60.

ANOTHER LITTLE KNOWN SERVICE comes from those offered by the Department of Education through its Vocational Training Division. The branch offers rehabilitation training to persons suffering from a handicap. They become self supporting and self respecting and are thus removed from charity rolls. The department for example, has helped a widowed mother learn how to type and to become able to support her family; helped police victims according to their capabilities; and even helped a person lacking self confidence to regain it, and be able to hold a job and maintain her place in society.

Lethbridge,

THE ISAAC WALTONS of the province are inspecting their lines and lures just about now, impatient at winter's tardiness in departing. A branch of the government, the Fisheries Branch of the department of Lands and Forests, is also busy preparing for the preparing fishermen. Computations are under way estimating the number of young fish that will be needed in the regular restocking program, and the places old and new, in which they may be placed to provide greater sport for the fishermen.

MOTORISTS using the province's highways will soon see new types of signs along the roads' edges. They will be signs identifying towns and places, and there will also be smaller name signs and highway marker signs. More colorful than the present name plates, they will be reflective and show well at night as well as during the daytime.

WITH ALL THE HOUSEBUILDING going on in Alberta, there is considerable appreciation by those involved in changing land ownership for the system of land registration there is in Alberta. The Land Titles Office, part of the Attorney General's Department, operate under what is known as the "Torrens system of land registration". This system stipulates that no ownership of land is considered to be legal until it is recorded at the Land Titles Office, and once it is so registered, no one else may dispute it; saving much in lawsuits and other difficulties.

THE EFFORTS of the Alberta Government Telephones to switch all phone services in the province to the new dial system is continuing apace. Fort Saskatchewan is the most recent community to make the change over. It takes much time and planning to make the change and to order equipment far enough ahead to have delivery when material is needed. In time, all the telephones will be on a dial system, with numbers of a type that will permit them to be linked with the international trunk system.

BE SEEING YOU SOON!

Your Future is Here... In Alberta

Consolidated School Unit Setup Explained at Meet

Well over 50 electors of the Crow's Nest Pass towns attended a nomination meeting in the Turtle Mountain Hotel at Frank Tuesday evening to discuss the formation of and nominate a slate of trustees for the newly formed Consolidated School District No. 78. The district embraces the areas

of Blairmore, Frank, Bellevue, Hillcrest and the newly formed district of Mohawk. Nominations were accepted until 9 p.m.

Attending the meeting were K. H. Thomson, official trustee of Pincher Creek and A. B. Wetter, field administrative officer of the Department of Education. William Jalpe of Blairmore was appointed chairman of the meeting and Charles Ritchie of Bellevue secretary.

Mr. Wetter explained that the

duties of the official trustee pointing out that he only held this position until such time that the new board was elected after which his duties ceased. He added that Blairmore as a town district was allowed two trustees, Frank one, Bellevue one, Mohawk one, and Hillcrest one and that one more trustee would be elected at large to form a seven man board. The trustee elected at large would hold his position until the next annual meeting in 1958, a period of one

year. The two at Blairmore would hold office — one for a period of one year the other until 1959 a two year period. The period of time for those trustees from Frank, Bellevue, Hillcrest and Mohawk was to be determined by the board at the organizational meeting.

ELECTION DATE

Dr. Thomson then explained the procedure in setting the date for the election and the meeting agreed that the date of election be set on Saturday, Feb. 2. A Saturday was chosen as the mines never work on this day. From a suggestion offered by Dr. Thomson it was agreed that a polling station be set up in each of the districts. Deputy returning officers would be appointed as well as polling clerks for each station.

Dr. Thomson explained to the meeting who are eligible to vote. Requirements are as follows: (a) A Canadian citizen of the full age of 21 years who is and has been a resident of the district for a period of not less than 30 days and who, 1. is the owner of property in the district liable to assessment for school purposes; or 2. is the tenant of property in the district liable to assessment for school purposes; or 3. is the tenant under an agricultural lease issued under the provisions of The Public Lands Act of property in the district; or 4. is the lessee from the Crown of property in a special area and in the district; (b) the husband, wife, son, daughter, father or mother of any person described in clause (a) if the husband, wife, son, daughter, father or mother is a Canadian citizen of the full 21 years of age and a resident of the established district; (c) a resident who is a Canadian citizen and who has in the current year or the previous year paid to the district or to a municipality situated wholly or in part within the district, a tax payable for school purposes in respect of property.

The matter of boundaries embraced by the new school district was discussed but was left over until the board was formed.

NOMINATIONS

At 9 p.m. nominations closed and at the wish of the meeting the names of the nominees were read out as follows: Blairmore—T. J. Costigan and Joe Duedde; Frank—Ludwig Margatak and V. J. Horejsi (election); Hillcrest—Mrs. Christina McNeil; Bellevue—Joe Christie and D. Quintillo (election); Mohawk—John Dugdale and Don Hayden (election). Members at large nominated were D. H. McRae of Blairmore and J. Hyslop of Bellevue (election).

Letter to the Editor

The Editor.

Dear Sir:

I am writing this letter to you with the hope that you will consider printing it in your paper as a service to the people suffering from, or interested in the work we are doing in connection with Epilepsy.

On December 5, 1955, The Calgary Epilepsy League applied for and received its charter as a charitable organization, pledged to the cause of the sufferers of Epilepsy. Although we are called "The Calgary Epilepsy League" we are not working for Calgarians alone. We are working for all those who are afflicted with this disability anywhere in Western Canada. Our work is to promote an understanding and improvement of the conditions surrounding this disability in our communities. We are working to improve the educational, social and employment problems encountered by Epileptics and thereby eliminate the mistaken theories that have been attached to it for ages past.

We of the Calgary Epilepsy League would like to hear from sufferers or interested persons. If you are interested please write: The Calgary Epilepsy League, 2436 - 4th ave. N.W. Calgary, or phone 886220 or 870572.

Awaiting your reply, I remain,

Sincerely yours,
W. D. TAYLOR,
Vice-President,
Calgary Epilepsy League.

A BALLAD FOR BURNS' NIGHT

(By William F. Wright)

There's an auld stain step in Dumfries;
It's immortal and priceless its worth.
On his way thru' the toon
Puir Robbie sat doon—
'Twas his last resting place on this earth.

Robbie, we all miss you,
His like has ne'er been seen.
The name to us means Scotland,
With its mem'ry ever green.

The son of an Ayrshire farmer—
He was quite a lady charmer.
And it's ever in our hearts that Robbie dwells.
He rose to fame and glory
And penn'd in song and story
The beauty of auld Scotland's lochs and fells.

Pause and think o' Robbie,
Asleep in Dumfries toon,
With Highland Mary resting
Far beneath yon Greenock moon.

The son of an Ayrshire farmer—
He was quite a lady charmer.
And there's one night in the year your fancy turns
To Scotland's famous poet.
The whole wide world should know it—
That we honor and adore ye—RABBIE BURNS.

Thus all loyal Scotsmen,
Where ever they may be
Meet once a year on BURNS' NIGHT
To revere his memory.

RCAF REVIEWS BUSY YEAR—Stepped-up activity at home and abroad marked 1956 as a busy year for the RCAF. The largest of Canada's armed forces with some 50,600 men and women, the Air Force found itself shouldering increased responsibilities on the domestic and world scenes. How and where the RCAF served is the subject of this photographic montage. 1. On the Mid-Canada Line—Throughout the year, helicopters of 108 Communications Flight from Station Rockcliffe, Ottawa, flew in support of Mid-Canada Line construction. Shown is an H-34 helicopter landing a sling load of supplies at one of the sites under construction. 2. UN Duty—Striking evidence of Air Transport Command's mobility came shortly before the year's end. In less than 48 hours after having been alerted for the move, C-119 aircraft of 435 Transport Squadron were under way to Naples, Italy, where they are now engaged in airlifting troops and supplies to Egypt for the UN Emergency Force. One of the C-119's is shown at Casadichino airport with famed Mount Vesuvius in the distance. 3. Air Defence—The watch on North American skies continues unceasingly, and components of Canada's air defence system require in fallible teamwork in carrying out their duties. Intensive oper-

ational training for both jet and radar members of the team continues, aimed at sharpening their already high capabilities. Here, in an exercise, CF-100 interceptors sweep low over the domes of a Pine Tree station. 4. Sub Killers—Responsible for shore based anti-sub operations and convoy protection, personnel of Maritime Command are constantly perfecting their skills in the various phases of their work. Modern aircraft like the P2V-7 Neptune shown here low over a sub during a training exercise, help them carry out their task. 5. Duty in Europe—No. 415, the first of four CF-100 squadrons designated for overseas service with the RCAF's No. 1 Air Division, left Ottawa's Uplands airport for Europe in the latter part of the year. A ceremonial sendoff, including this all-weather squadron's transfer to NATO duty. 6. On Wings of Mercy—Answering almost 800 requests for aid, aircraft of the RCAF's search and rescue organization flew some 6,000 hours. Some, like this helicopter on the lawn of Vancouver's Shaughnessy hospital, were carrying out a new concept in the movement of critically injured patients through crowded cities.

Is child psychology a fad?

(The Clarion, Kindersley, Saskatchewan—October 23, 1956)

Child psychology is not a fad, says the October Canadian Home Journal. Nor is it a collection of lurid stories of problem children without discipline. On the other hand, it's not a set of techniques to get children to obey, or rules on how to bring up children. It's not even a scheme to blame parents for their mistakes, or a way of worrying them about parental responsibilities.

With these words, Dr. Karl S. Bernhardt, professor of psychology at the University of Toronto and assistant director of the University's Institute of Child Study, destroys most of the myths currently circulating about the usefulness of this science.

If you're bringing your children up "by the book" you are not necessarily a good parent—there is no ready-made set of answers to all the problems of child guidance, says Dr. Bernhardt. Nor is common sense alone sufficient. It takes more than common sense to be a good cook and the job of raising children is much more complicated and exacting than cooking.

What is child psychology? It is, says Dr. Bernhardt, the finding out of what goes into the making of a happy mature, well adjusted child. It assumes that children are neither good nor bad by nature, but are capable of becoming either, depending on what happens to them. It doesn't let us blame things on "nature" or "heredity," but makes us look for the reason in the child's experience. It is showing us that the foundations of mental health are laid in childhood; that childhood experiences determine the shape of a personality.

Dr. Bernhardt explains why you should remember the following golden rules: Enjoy your child. Remember he reflects your feelings. Give him time to grow up. Let him learn by his mistakes. Take time out to observe his behavior. Don't anticipate trouble. Keep a long-range perspective.

Bringing up children is a succession of problems which should be a joy to parents to solve—for there's nothing more satisfying than meeting a difficult situation and solving it under your own steam.

Right-of-way looks different from a hospital bed!

(The Mail, Drumheller, Alberta—September 12, 1956)

Far too often, it appears, many drivers place too much importance on the term "right-of-way."

In many accidents, the first words uttered by a driver as he hurries to upbraid the other driver are, "I had the right-of-way."

Officials of insurance companies say nearly 25 percent of all accidents are caused by drivers who think they have the right-of-way, but don't.

One writer has said that "Right-of-way looks different from a hospital bed." Another point is that right-of-way never will do a driver any good if the driver doesn't know he has it.

In other words, the driver's knowledge that he has the right-of-way isn't at all insurance that all drivers have the same knowledge. Right-of-way has become the famous last words of many drivers who were convinced they had it—and took it, observes the Canadian Motorist.

One of the contentious points is the right-of-way at intersections. In Alberta, The Vehicles and Highway Traffic Act says that when two vehicles approach or enter an intersection at approximately the same time, "the driver of the vehicle that is to the right of the driver of the other vehicle shall have the right-of-way; the driver of the vehicle that is to the left of the driver of the other vehicle shall yield the right-of-way to the other vehicle."

Power interruptions

(The Times, Taber, Alberta—November 1, 1956)

Just how dependent are we as a whole on our utilities? All utilities, just like the sunshine and the rain or night and day, are taken pretty much for granted until something happens to interrupt the smooth flow.

Of all our utilities we have found that the Natural Gas supply is the only one that has operated through the years without a break, that is an enviable record.

The electrical distribution problem is a little more difficult but we still wish that the Calgary Power could come up with some answer to power interruptions. This week we were particularly annoyed when the power was off from 1 to 3.30 on Wednesday afternoon—it meant interruption and disorganization in the job of getting the "Times" out and was responsible to some extent in the paper being a little late this week.

We recall that some years ago there was talk of a new loop circuit that would insure Taber getting uninterrupted service in the event of some section of the power line having trouble. Just what became of that plan? And why can't it be put into force?

How to Reduce Swollen Painful Piles

Here is a safe, clean, easy way to get relief from the itching, stinging, swelling, painful piles without the inconvenience of ointments, pills, plasters or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Keeps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use. How effective it is and how much more comfort it will quickly bring you. All drug stores, Laidlaw's and Laidlaw's are stocked with Hem-Roid. If you are not 100% pleased, return it for a full refund.

Black cat turns white

James W. Wright had a jet black Persian cat. Old Tab was always giving trouble trying to get the canary. One day, while the cat was figuring out a new approach, the bird cage fell, striking the floor with a loud clatter and rolling around noisily. The frightened cat ducked for cover.

Old Tab disappeared for over 24 hours. When he finally showed again, there was a white ring around his neck. Wright says that the ring has spread now until only the cat's tail remains black. Some scare!

Hunter, hunter—spare my child

(The Clarion, Kindersley, Saskatchewan—October 4, 1956)

Hunters are such a facility. (Hunters need not feel virtuous about this because if the ducks were not protected for their benefit the farmers would not have a duck problem.) However, (and we don't regard their attitude as being VERY unreasonable) they are not prepared to sacrifice their children in order to protect their crops or their reputation for hospitality.

The appeal we are about to make is to the decent, sensible majority of hunters who don't endanger the lives of others or abuse the property of hospitable hosts. There is no point in appealing here to the ones who do because of others or abuse the property of hospitable hosts. There if they can read (a doubtful question in itself) they have laughed off this editorial several paragraphs back.

We can think of only one way to deal with such blunders on the face of humanity. It is for all the decent sportsmanlike hunters to co-operate with the authorities in their attempts to deal with this problem. Most of the things we've been talking about involve infringements of the law. When you see them, report them. There is a reluctance, especially among many sporting people, to take such action. It is regarded as tattling, which is unsportsmanlike—not cricket. But is it sportsmanlike to condone a nation which may lead to the injury of your benefactor? We think it isn't—and we know it isn't smart.

A couple of weeks ago, we had a phone call from a farmer's wife and were greatly astonished to learn the nature of a problem which is causing her deep concern. Along with conservation officers, Fish and Game League officials, policemen and other newspapers, we had joined in issuing warnings to hunters to be careful not to kill or maim themselves, their companions or any domestic livestock, never to shoot up a farmers buildings and not to leave open pits in his fields or his gates ajar.

There was one thing all of us had missed. This lady wanted us to ask the hunters not to kill or maim her children.

Crazy? Far from it. This woman's fears are only too well justified. Here's the story:

Her husband's farm is a popular hunting site and access to the flooded areas, where the game congregates, is gained by means of a road which runs through the farm yard where her toddling children play. Her problem is that hunters drive through her yard at such speeds as to endanger the lives of her children.

Like most farmers with water on their land, these people want to co-operate with the hunters. Apart from the fact that they are friendly folk and like to get along with other people, they need to take advantage of every legal facility for the control of duck damage.

Doctor is honored

(The Sun, Swift Current, Saskatchewan—October 11, 1956)

The College of Physicians and Surgeons at the annual meeting of the Saskatchewan Medical Association in Saskatchewan Medical Association in Saskatoon honored Dr. O. M. Irwin of Swift Current with a senior life membership. The veteran local medic is Swift Current's longest practising active doctor, and the recognition is deserved. There are not too many of the old "country doctors" around and active yet, but they will be a breed remembered by the older generation especially those who broke ground on these prairies in the earlier days. These men who had to minister to folks in old homestead shacks and on farmsteads, far removed from the fine gravel or paved highways of today, often, most often, answering calls by buckboard and team in everything from hurricanes to mighty blizzards.

Dr. Irwin came here as a young man from his practice in Neville and from the outset fitted into the pattern of our prairie town, as did others in his era and before, names to be remembered like McArthur, Hoppin, Graham, Kelly, Burroughs and Swift Current's No. 1, Dr. W. H. Field himself.

But it hasn't been only in the field of medicine that country doctors like Dr. Irwin have contributed to their fellow men, for most of them have given so much in the field of public and community service. Dr. Irwin, besides his many other public services, with a senior life membership, member of the public school and collegiate boards and goodness knows what not. These "country doctors" have been an integral and vital force in the communities of Western Canada, and when Dr. Irwin of Swift Current was honored it was, besides the medical service implications a tribute to so many of these men who served an earlier era of pioneer people.

Pride and prejudice

(The Canadian, Camrose, Alberta—October 24, 1956)

A certain business man from Vancouver called upon The Canadian during the week and in the course of the general conversation we got into discussion on the shipping situation. It would seem that the world in general is short on merchant ships, in spite of the millions of new tonnage built since the end of World War II. On the other hand, the United States has many merchant ships tied up, for the simple reason that costs of operation are too high to compete on the world market. The labor unions rule the roost and would rather see their men idle than permit them to meet competition. Not only does this situation affect the ships under United States register, but sympathetic unions make all sorts of embarrassing situations for ships under foreign register that dock with cargoes men's unions are a low unto themselves, even above the courts of the land. We can believe that there are rights and wrongs on both sides, but we can't reconcile the situation as a permanent basis for progress. The United States authorities should be able to work out some solution so that their ships could again go to sea.

IN THE HOME WORKSHOP

Modern lamps

These lamps are made by joining wood and metal to make unusual modern designs. The material used is available at the nearest lumber yard and hardware store. Pattern gives actual-size cutting diagrams and illustrated directions for assembling and finishing. Price of pattern 204 is 35c.

Plant stand

House plants of all types will find a happy home on this stand which offers both sun and semi-

shade. The graduated shelves lock into upright sections—all of stock sizes of lumber. Pattern 463 shows every step and will be mailed for 35c. This pattern is one of five in the packet Shelves and Stands for the Handy Man to Make. Price \$1.50.

Address order to:

Home Workshop Patterns,
Department P.P.L.,
4435 West 5th Avenue,
Vancouver, B.C.

DIET OR NOT?

The human body is in a quandary today. Millions of advertising dollars teach us to eat our vitamins and put weight on ourselves. More millions of advertising dollars, particularly the institutional ads of the large insurance companies, warn us of the pitfalls of fat.

What are we to do? Exceed the feed limit? Or take that most difficult exercise of all, lean against the table and push it away with all our might?

Usually the mirror, not the doctor, tells us what to do. If we become as broad as a quarter past nine or, as J. B. Priestley describes it, a vast waddle of womanhood, we turn to diet. And the comforting assurance we get from this discipline is furnished by Paulette Goddard. She says that if a girl doesn't watch her figure, the boys won't.

The bat is the only mammal with wings enabling it to fly.

WEEKLY BIBLE COMMENT

WE SHOULD BE MORE KINDLY AND HUMANE

The problem of human suffering is always acute. At this present hour, thousands of freedom-loving peoples in Eastern Europe are suffering incredible hardships—famine, violence, the threat of disease.

The problem is no less acute because this is suffering induced by man. A poet once said, "Man's inhumanity to man makes countless thousands mourn."

One of the things that impress us is the amount of suffering that could be alleviated or avoided if men took a different attitude. We are troubled that people suffer. And yet, how much in our own attitude has to do with the conditions that make for suffering?

If we do not protest, if we do not strive to make the conditions of life more humane, we may actually offend in doing things that cause people to suffer.

Think of the amount of suffering, for instance, that has resulted from bigotry and prejudice.

There is a story in Luke of a poor woman who had been ill for 18 years, so bowed over she could not lift herself up. Yet when Jesus healed her on a Sabbath day, the ruler of the synagogue was moved with indignation.

Jesus denounced him and all who shared his attitude as hypocrites. How much of such shameful and cruel hypocrisy there has been in the world and how much of it persists even at the present hour!

Does our religion, above all things, make us kindly and humane? Or are we among those who value conformity to ritual more than gentleness, goodness and blessing?

Courtroom capers

"I understand you called on the plaintiff," the lawyer stated.

"Yes," answered the witness.

"What did he say?"

"The prosecutor leaped to his feet and in a fit of anger denounced the question as false, misleading, tending to incriminate an entirely innocent party, etc. He also accused the attorney for the defence of illegal tactics, being an immoral person, guilty of malicious practices in daring to try to introduce such testimony. He also questioned the legitimacy of the attorney's birth. The defence lawyer sprang for the throat of his accuser and the courtroom was in bedlam. The judge rapped for order and finally court attendants subdued the two antagonists but not before they bloodied each other's noses and blackened each other's eyes. Then the judge ruled that if the attorney would repeat the question the witness would be directed to answer it."

"I repeat then," said the lawyer, wiping blood from his upper lip.

"What did he say?"

"He didn't say a thing," answered the witness. "He weren't home."

Sweet Treat

And so easy with fast-rising Fleischmann's Active Dry Yeast... a treat that will bring demands for "more, please!"

Honey Bun Coffee Cake

1. In an 8-inch square cake pan, melt 3 tablespoons butter or margarine. Drizzle with 1/2 cup honey and sprinkle with 1/2 cup broken salted nuts.
2. Scald 1/2 cup milk. Remove from heat and stir in 1/4 cup honey, 1/4 teaspoon salt, 1/4 cup shortening. Cool to lukewarm.
3. In the meantime, measure into a large bowl 1/2 cup lukewarm water, 1 teaspoon granulated sugar and stir until sugar is dissolved. Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast.

- Let stand 10 minutes, THEN stir well. Stir the lukewarm milk mixture and 1 well-beaten egg 1/2 teaspoon vanilla into the yeast mixture. Sift together once 2 cups once-sifted all-purpose flour, 1/4 teaspoon ground cinnamon.
- Sift dry ingredients into yeast mixture and stir until well blended—about 1 minute.
- Spoon mixture into prepared cake pan. Cover. Let rise in a warm place, free from draft, until doubled in bulk—about 1 1/4 hours. Bake in a moderately hot oven, 375°, about 35 minutes. Turn out of pan immediately. Serve warm.

Personalities IN THE NEWS

Winners of the whist drive held in the St. Alban's Anglican hall on Monday, Jan. 28, were as follows: Ladies' first, Mrs. J. Bowman; second, Mrs. N. Hotte; gents first, Mr. C. Clark; second tied between Mrs. S. Penny and Mr. F. A. Dyke, Mrs. Penny won the draw.

Mr. and Mrs. E. Gushul of Lethbridge visited relatives and friends in town over the week-end.

Mrs. A. Beveridge was a patient in the C. N. P. hospital last week. We are pleased to hear she is home again.

The Goodwill W. A. of St. Paul's United church will hold a Valentine Tea in the church club room on Saturday, February 9th.

Richard Tiffin now employed at Swift Current visited last week with his parents Mr. and Mrs. Tiffin. While home he celebrated his 21st birthday.

Mrs. R. Collings was a Calgary visitor last week.

Hospital Board Names Officers

Mr. M. G. Graves P.C.A. of Calgary was re-elected chairman of the Hospital Board of the Alberta Red Cross Crippled Children's Hospital during the Board's first meeting of the year at the hospital January 21st Mr. G. C. Lancaster and Lt. Col. D. H. Tomlinson, both of Calgary, were returned to the offices of vice-chairman and secretary respectively.

Named to the personnel committee of the board were, Mr. F. E. Spooner, chairman; Dr. A. W. Park and Mrs. A. W. Tracey, all of Calgary. Mr. G. C. Lancaster will head the property committee for the coming term with Mrs. S. A. Adams and Mr. W. J. Snaddon, all of Calgary, committee members.

The meeting supported a resolution granting Miss Margaret Baxter, Director of Nursing at the Alberta Red Cross Crippled Children's Hospital, leave of absence during her term overseas with the Canadian Red Cross Society and agreed to appoint Miss Phyllis Weir as acting Director of Nursing at the hospital during Miss Baxter's absence. Miss Weir is presently assistant director.

Faster Service At Owen's

Owen's Red and White store in Coleman installed a new "Speedy Counter" this week that is the only one of its type in the Pass to date.

The counter was locally made by Furcio DeCecco and features a revolving section at the top that greatly reduces handling time.

To accommodate the new counter some of the store shelves were re-arranged.

High Speed Death In Slow Motion

What happens to flesh and blood to glass and steel in those last split seconds when a human being is hurled into eternity as his automobile strikes a tree?

Physicians, safety engineers, and crash experts who have crash-tested hundreds of cars and minutely examined bodies of scores of accident victims tells the vividly horrifying story in an article "Slow Motion Picture of High Speed Death" in the February Readers' Digest.

1/10th second, the front bumper and grill work collapses as the car, going 55 miles per hour, hits a solid immovable tree. At 2/10ths of a second, heavy structural members of the car begin to act as a brake, but the driver's body ramrod straight, still hurtles forward at 55. His knee joints shatter.

At 4/10ths, the rear of the car rises like a bucking horse and scrapes bark off lower limbs of the tree. The car is slowed to 35 miles an hour but the driver's body is still catapulted forward at 55.

At 5/10ths, the driver is impaled on the steering shaft with the steering wheel twisted into an almost vertical position by his fear-frozen hands.

Friends of Mr. C. Freeman are glad to see him home again after a trip to Mayo Clinic. Hope your health will keep improving Charlie.

Mr. A. Phillips is home again after several weeks spent in the C.N.P. Hospital.

Miss Marion Fauville of Calgary visited with her parents Mr. and Mrs. A. Fauville last week.

Mr. W. Burrows has returned from Calgary where he underwent surgery. Hope to see you out and around again soon.

Jimmy Ewing attending Tech school in Calgary visited his parents Mr. and Mrs. J. Ewing over the week-end.

Mr. and Mrs. R. Pattinson and daughter Georganne visited the latter's parents, Mr. and Mrs. H. Halliwell at Fort Macleod.

Mr. and Mrs. J. Morris of Kamloops are visiting at the home of the latter's parents, Mr. and Mrs. W. Roushead.

Mr. W. Nelson has returned to Calgary where he will spend an extended visit with his son and daughter-in-law, Mr. and Mrs. C. Nelson.

The horrifying climax comes at 6/10ths of a second when the driver's feet are ripped from his tightly laced shoes, his head smashes into the windshield. The brake pedal shears off at the floor board, and the chassis bends in the middle shearing body bolts.

Just one tenth of a second later, the car body is twisted out of shape, doors spring open and the seat rams forward jamming the driver hard against the steering shaft. Blood leaps from his mouth. He dies.

Elapsed time - seven tenths of a second.

Notice To Creditors And Claimants

In the estate of John Youschok, late of Coleman, Alberta, retired, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named John Youschok who died on the 28th day of November, 1956, are required to file with the undersigned by the 15th day of March, 1957, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 10th day of January, 1957.

T. J. COSTIGAN,
Solicitor for the Executor,
Blairmore, Alberta.
